POSTED 10 Home Study Interview Results Report FINAL.pdf

Here's a product from the WV TAP project that summarizes findings from interviews conducted with 10 (only 10) homeowners in Charleston. Also, keep in mind that these interviews were conducted in February, in the midst of a lot of issues and questions about the lingering odor of the chemical.

Subject: New Yorker story on WV spill

FYI on this new story from the New Yorker on the West Virginia spill...it focuses mostly on state-level actions & issues, and EPA is mentioned only in passing.
